

THURSLEY - House and garden remodelling

Sketch Scheme

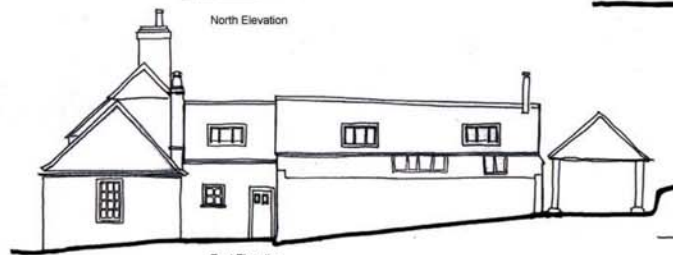

Local authority resistance to major remodelling of the garden and house of this locally listed building within Thursley Village Conservation area, was overcome by formulating an intuitive design. The proposed design was first submitted to the council in sketch form for a pre-application consultation. Negotiation then ensued prior to submitting the planning application proper. We were able to establish that the remodelling would preserve the ancient fabric and benefit the character of the building and surrounding area. Oak framing compliments the structure of the original house.
